Russ,

Yesterday we advised Walter that ORC had invited Grid to a portion of the meeting with NYC on the morning of Tuesday 12/29. He's OK with it.

Monday we'll be sending NYC a letter noting the invite in our letter.

We'll be in room 1940.

Typically Rob Fox, Robin Levine, Rachel Cohn, Kevin Clarke, Chris King and someone from Parks have been attending for the City. Grid can bring legal and technical folks in any configuration you feel is useful.

For EPA, it has been myself, my management, Walter and sometimes one of Christos' managers, but not Christos.

One of the particular things we will be discussing is the concept of using the PDI for Parcel VII to reach a spatial determination of where Grid's excavation responsibilities end and where NYC should dig, to see if the parties will agree to a preliminary line-drawing approach. This may or may not be workable, but Grid's detailed understanding of the existing data will be helpful.

On a related issue, EPA has to date assumed that Parcel VI would need to be fully excavated by Grid. Based on the attached layout, this may have been an oversimplification on our part. It may also be that the contamination does not go down as deep as the tank will (40-45 feet roughly). If Grid has an understanding of the Parcel VI data in this regard, it would be helpful for your client to be prepared to discuss this as well.

I will be in touch early next week after we've finished our documents to send the City.

regards,
Brian E. Carr
